

To Whom it May Concern:

I am writing to express my support for the Heritage Prairie Wind project. The project provides a stabilizing source of revenue for local families and also provides economic and employment benefits to Livingston County and the surrounding communities.

Over the project's lifetime, Heritage Prairie Wind is estimated to provide over \$86 million in tax revenue in Livingston County. This stable, long-term revenue will directly support education, community services, roads, and first responder capabilities in both Livingston and Kankakee Counties. Our area school districts and community college will receive over half of this revenue, creating more opportunities for our young people.

Additionally, the land-lease payments landowners like myself receive offer reliable and diversified revenue. This money offers financial stability and security that helps keep generational land in local farm families. Not only will regular payments stabilize income, they will also increase landowners' ability to spend locally. This economic boost, including the increased demand for lodging, food services, gas and groceries during construction, will have a significant economic impact in Livingston County and the surrounding areas.

I feel secure working with Pattern Energy and ConnectGen because they are responsible developers in the energy industry. They have a commitment to relationship building and open communication in the communities they serve, and I believe they are trustworthy partners to develop a renewable energy project in Livingston County.

The Heritage Prairie Wind project represents a capital investment of more than \$850M in Livingston County and the surrounding areas. It is expected to create hundreds of local jobs during construction and 15-20 jobs in long-term wind facility maintenance. This project will meet the economic needs of our community and increase accessibility to reliable, renewable energy.

I am proud to support the Heritage Prairie Wind project and encourage you to do the same.

Sincerely,

Dorlene Drechsel Trust

I am writing to express my support for the Heritage Prairie Wind project. The project provides a stabilizing source of revenue for local families and also provides economic and employment benefits to Livingston County and the surrounding communities.

Over the project's lifetime, Heritage Prairie Wind is estimated to provide over \$86 million in tax revenue in Livingston County. This stable, long-term revenue will directly support education, community services, roads, and first responder capabilities in both Livingston and Kankakee Counties. Our area school districts and community college will receive over half of this revenue, creating more opportunities for our young people.

Additionally, the land-lease payments landowners like myself receive offer reliable and diversified revenue. This money offers financial stability and security that helps keep generational land in local farm families. Not only will regular payments stabilize income, they will also increase landowners' ability to spend locally. This economic boost, including the increased demand for lodging, food services, gas and groceries during construction, will have a significant economic impact in Livingston County and the surrounding areas.

I feel secure working with Pattern Energy and ConnectGen because they are responsible developers in the energy industry. They have a commitment to relationship building and open communication in the communities they serve, and I believe they are trustworthy partners to develop a renewable energy project in Livingston County.

The Heritage Prairie Wind project represents a capital investment of more than \$850M in Livingston County and the surrounding areas. It is expected to create hundreds of local jobs during construction and 15-20 jobs in long-term wind facility maintenance. This project will meet the economic needs of our community and increase accessibility to reliable, renewable energy.

I am proud to support the Heritage Prairie Wind project and encourage you to do the same.

Sincerely,

*Mark Christman*

To Whom it May Concern:

I am writing to express my support for Heritage Prairie Wind project. The project provides a stabilizing source of revenue to my family and also provides economic and employment benefits to Livingston County and the surrounding communities.

Over the project's lifetime, Heritage Prairie Wind is expected to provide the local community over \$98.5 million in tax revenue in Livingston County. This stable, long-term revenue will directly support education, community services, roads, and first responder capabilities in both Livingston and Kankakee Counties. Our area school districts and community college will receive over 70% of this revenue, creating more opportunities for our young people.

Additionally, the land-lease payments I will receive as a landowner offer reliable and diversified revenue for my farm and family. This money offers financial stability and security that helps keep generational land in local families like mine. Not only will regular payments stabilize income, they will also increase landowners' ability to spend locally. This economic boost, including the increased demand for lodging, food services, gas and groceries during construction, will have a significant economic impact in Livingston County and the surrounding areas.

I feel secure working with Pattern Energy and Repsol because they are responsible developers in the energy industry. They have a commitment to relationship building and open communication in the communities they serve, and I believe they are trustworthy partners to develop a renewable energy project in Livingston County.

The Heritage Prairie Wind project represents an investment of more than \$1.3 billion in Livingston and Kankakee Counties. It is expected to create hundreds of construction jobs and 12-16 long-term jobs. This project will meet the economic needs of our community and increase accessibility to reliable, renewable energy.

I am proud to support the Heritage Prairie Wind project and encourage you to do the same.

Sincerely,

A handwritten signature in black ink, appearing to read "M. R.", with a long horizontal flourish extending to the right.

To Whom It May Concern,

***I am writing to express my enthusiasm and support for the Heritage Prairie Wind Project.***

Heritage Prairie Wind will bring many short-term and long-term benefits to the community, including significant economic opportunities. It will provide affordable and reliable power, generated right here in Livingston County, and will create a stabilizing source of revenue for landowners.

The Heritage Prairie Wind project will benefit not just me but my community and all of Illinois. This project represents an investment of over \$1.3 billion in Livingston County and Kankakee Counties. The project will positively impact the local economy, paying an estimated \$98.5 million in tax revenue in Livingston County over the project's lifetime. This will benefit our local community, schools, hospitals, first responders, and more. Heritage Prairie Wind is also expected to create hundreds of local jobs during construction and 12-16 jobs in long-term wind facility maintenance and operations. As local traffic during construction increases, so will local spending as the demand for lodging, food services, gas, groceries and other services grows.

The land lease payments offered by the project create reliable and diversified revenue for my farm. Not only do these regular payments stabilize income in an uncertain economy, they also give landowners the opportunity to increase spending locally. These payments allow landowners like me to invest further in our property, our business, and our community.

As the Heritage Prairie Wind project moves forward, I am proud to offer my support. I look forward to the many new opportunities it will provide, and we welcome the revenue it will generate for the local community.

Thank you,

Glenn Ferrari

To Whom It May Concern,

As a landowner in Livingston County, I am writing to express my strong support for the Heritage Prairie Renewable wind project. While agriculture remains a cornerstone of our local economy, embracing innovative solutions that maximize economic opportunity for years to come is crucial.

Our community has experienced fluctuations in economic stability, and we are often challenged with concerns about job security and attracting new business opportunities. The Heritage Prairie project promises job creation and economic investment during construction and throughout its operational life. This influx of resources will benefit local businesses, generate tax revenue, and provide much-needed economic stability for our families and communities.

I am particularly impressed with Heritage Prairie's commitment to responsible land stewardship. From partnering with local farmers to ensure minimal disruption to agricultural activities to prioritizing the preservation of wildlife habitats, they have demonstrated a deep respect for our land and its resources. This collaborative approach, coupled with open communication and engagement with the community, fosters trust and ensures that everyone benefits from the project's success.

Beyond these economic advantages, I also believe the Heritage Prairie project embodies the spirit of innovation and progress I value in our community. It signifies our willingness to embrace new technologies, explore sustainable solutions, and contribute to a more prosperous economic future.

I urge everyone to consider the benefits of the Heritage Prairie Renewables project seriously. I believe this project presents a unique opportunity for our community, and it's incumbent on the Livingston County officials to ensure we're able to take advantage of it.

Sincerely,

To Whom It May Concern,

***I am writing to express my support for the Heritage Prairie Wind project.***

Heritage Prairie Wind will invest in the local Illinois economy and provide Livingston County and the surrounding area with long-term community benefits.

This ~600MW wind facility, jointly developed by Pattern Energy and Repsol, represents an investment of more than \$1.3B in our local communities. It will provide safe, affordable, renewable electricity to the needs of more than 150,000 American homes annually.

Our community can feel confident working with Pattern Energy and Repsol, two leading renewable energy companies emphasizing relationship building and open communication in the areas they serve. This proposed project will provide economic benefits and jobs lasting generations, all privately financed by two highly regarded companies in the energy industry.

Livingston County will benefit from the estimated annual tax revenue totaling more than \$98.5M over the project's lifetime. This stable, long-term revenue will directly contribute to education, community services, roads, and first responder capabilities in our local area. Over 70% of this revenue will be funneled into area school districts and our local community college, increasing our community's access to education.

In addition to providing significant economic opportunity in Livingston County and the surrounding area, this renewable energy project will also bring diversity to our energy supply. Many members of our community will benefit from the tax revenue, and the farmers/landowners who lease their land will also gain a new source of income.

I welcome the Heritage Prairie Wind project and look forward to seeing renewable energy in my community.

Thank you,

To Whom It May Concern,

I write to express my support for the Heritage Prairie Renewables project proposed for Kankakee and Livingston Counties. As a landowner directly involved in the project, I have had the opportunity to learn about its goals and see firsthand how it can benefit our community in various ways.

While I understand there may be different perspectives on wind energy projects, I want to focus on this specific proposal's economic and community-driven benefits. Here are just a few reasons why I believe Heritage Prairie Renewables is the right partner for our community:

This project will bring much-needed economic stimulus to our region. Landowners like me will receive long-term lease payments, helping stabilize our income and contribute to the local economy. Additionally, the construction and operation of the wind farm will create good-paying jobs, further bolstering our community's financial health.

Heritage Prairie Renewables has committed to significant infrastructure upgrades in our area, including road repairs and improvements to electrical systems. These improvements will benefit the wind farm and enhance the overall quality of life for all residents.

The project's developers are also strongly committed to responsible land management. They will work with landowners to ensure minimal disruption to our agricultural practices and maintain the long-term sustainability of the land.

The team at Heritage Prairie Renewable has actively engaged with our community, respectfully listening to and addressing concerns. They have also shown a dedication to supporting local initiatives and organizations, fostering a sense of partnership and collaboration.

This project presents a unique opportunity for our community to experience significant economic growth with a dedicated developer. Everyone should learn more about this project and consider its potential benefits for our future.

Sincerely,

Project Landowner

June 2024

To Whom It May Concern,

I am expressing my strong support for the Heritage Prairie Renewables project proposed for Kankakee and Livingston Counties. As a landowner in Livingston County, I believe this project significantly benefits our community and our region's future.

I have been impressed with Heritage Prairie Renewables' commitment to open communication and addressing those concerns with landowners and community members. In my experience with Heritage Prairie Renewable, they have expressed a genuine interest in partnering with our community and have supported events that acknowledge and bolster our agricultural heritage like the Livingston County Ag Fair.

Additionally, the project is expected to create hundreds of jobs during construction. These jobs create income-making opportunities for our local community and include heavy equipment operators, electricians, laborers and others. New jobs and increased traffic to our area during the construction period will also increase the demand for local lodging, food services, gas and groceries, further driving economic growth in Livingston and Kankakee counties

The project will generate more than \$98.5 million in tax revenue over the lifetime of the project for local governments in Livingston County, which can be used to improve roads, schools, and other essential services. In Livingston County, over 70% of this revenue will be funneled into area school districts and our local community college, increasing our community's access to education. This will benefit all residents, regardless of their position on the project.

I believe Heritage Prairie Renewables is a responsible and well-planned project that will substantially benefit our community. I welcome the opportunity it will create in Kankakee and Livingston counties and encourage you to do the same.

Sincerely,

Project Landowner
